

Job Description

Procurement & Last-Mile Manager

We are hiring: Procurement & Last-Mile Manager – The Art of Sourcing for Excellence

Join CLOUD50 Germany, a premium culinary company redefining aviation and hospitality experiences through precision, design, and human excellence.

What We Offer

At CLOUD50, you'll join a high-performance team dedicated to perfection through calm precision. Our procurement philosophy is built on trust, consistency, and strong partnerships with local and international producers.

Here is an opportunity to play a vital role in the supply chain of a high-end hospitality company – sourcing not just commodities, but curated products and delivering them through a seamless logistics network tailored to VIP and VVIP services.

You'll work directly alongside our culinary leadership and operations teams to ensure every order in the pipeline meets the CLOUD50 promise of excellence.

Highlights of what you can expect:

- Strategic Lead the end-to-end procurement cycle for all food, beverage, packaging and non-food items across CLOUD50 Germany.
- Curate and manage partnerships with premium suppliers who share our values of sustainability, quality, and innovation.
- Execute last-mile deliveries for VIP & VVIP clients with precision, discretion and absolute reliability.
- Maintain inventory and purchasing systems; ensure traceability, cost control, and audit readiness — aligning with procurement best practices seen in leading industry peers.
- Be the daily interface between production, logistics, suppliers and service teams – ensuring the brand promise is fulfilled from sourcing to delivery.

Job Summary

As Procurement & Last-Mile Manager for CLOUD50 Germany, you ensure that every element behind the scenes is perfectly orchestrated.

From sourcing the best ingredients to delivering the final detail to a private jet or exclusive event, your work defines operational excellence and brand integrity.

Your role combines strategic procurement, logistics coordination, and a service mindset in a dynamic, high-paced environment. You actively contribute to process optimization, cost efficiency and supplier innovation – while collaborating with our culinary, operations and business teams.

You are not simply a procurement manager – you are the guardian of quality, partner in logistics and ambassador of the CLOUD50 experience. You act where logistics meets gastronomy, and every interaction matters.

Your sourcing decisions will shape the product. Your logistics execution will shape the experience. Your precision will shape the company.

Main Duties & Responsibilities

Procurement & Purchasing

- Source and purchase all food, beverage and non-food items based on daily production and event schedules.
- Negotiate terms, lead times, and supplier contracts to optimize cost, quality, and delivery reliability.
- Maintain an approved supplier database, monitor performance and drive continuous improvement.

Inventory & Quality Control

- Monitor stock levels, track expiry dates, ensure freshness, and maintain compliance with HACCP and company standards.
- Check inbound goods for accuracy, condition and documentation; escalate discrepancies appropriately.

Logistics & Last-Mile Execution

- Plan and execute last-mile deliveries to aircraft, VIP clients and event locations under high-spec conditions.
- Coordinate with logistics partners to ensure transport conditions meet temperature, hygiene, and presentation requirements.
- Maintain delivery records, documentation, and ensure service level agreements are met.

Administration & Coordination

- Work with finance and operations teams for purchase orders, invoices, budget tracking, supplier performance metrics, and cost-saving initiatives.
- Participate in production planning meetings, support scenario forecasting and ad-hoc purchasing for high-end orders.
- Support supplier audits, sustainability initiatives and procurement reports.

Qualifications & Skills

Education

- Degree in Procurement, Logistics, Supply Chain, Hospitality or a comparable field.
- Additional qualification in Supply Chain Management or Food Logistics is a plus.

Work Experience

- Minimum 3–5 years of procurement, logistics or purchasing experience in hospitality, aviation catering or food distribution.
- Experience working with premium or luxury service environments, and track record in handling specialist or high-value goods.

Technical Skills

- Strong organizational, analytical, and logistical skills
- Understanding of cold-chain management, HACCP, traceability and service-level logistics.
- Proficiency in Microsoft Office (Excel, inventory tools), experience with ERP/purchasing systems advantageous.
- Valid driver's license (Class B) required.

Soft Skills

- Calm under pressure, highly reliable and detail oriented.
- service mindset; passionate about sourcing, quality, and operational excellence.
- Discreet, trustworthy, with strong communication skills and the ability to work cross-functionally.
- Independent yet team-oriented: you collaborate yet take ownership.

Language Skills

- German: required (native or fluent)
- English: required (native or fluent)
- French: an advantage
